## Summary

Software developer and designer with experience building tools, platforms, and interfaces across startups, freelance work, and corporate teams. Skilled in Python and JavaScript for development, and Webflow, HTML/CSS/JS, and Adobe Creative Suite for design. Focused on clean UX, fast performance, and solving real problems. Background in web design, data analysis, and backend systems, with past work including accessibility features at Barclays, lead-gen algorithms at NicheFish, and appeal automation at FineFriend.

## Experience

### FineFriend, Software Developer

- Built backend algorithms to analyse UK parking fine data and identify appeal opportunities based on council error patterns and legal exceptions.
- Developed a rule-based system in Python to auto-generate draft appeals, using NLP to match ticket reasons with relevant precedent templates.
- Helped launch the core web app (Flask + PostgreSQL), improving response time by optimising database queries and caching legal references.

Online Work  
Aug 2025 – Present

### Self-employed, Freelance Web Designer & Developer

- Designed and launched websites using Webflow, HTML, CSS, and JavaScript for small businesses and personal clients.
- Built responsive layouts and interactive components, focusing on fast load times, and clean UI.
- Worked directly with clients to define site goals, iterate on design, and deliver final products on short timelines.

Online Work  
May 2023 – Present

### Banco De Oro (BDO), Data Analysis Intern

- Analysed financial data from multiple clients to support audit procedures and internal risk reviews.
- Used Python (pandas, NumPy) and SQL to clean and join data from different sources, reducing time to insight by approximately 30%.
- Created pivot tables and dashboards in Excel to present trends, red flags, and insights to audit teams.
- Assisted in building a scoring model for client credit risk using historical financials and benchmark indicators.

London, United Kingdom  
Jun 2024 – Jul 2025

### Barclays, Software Development Intern

- Engineered and prototyped accessibility feature enhancing support for visually impaired users in Barclays mobile app.
- Partnered with a cross-functional team to leverage React Native and TypeScript.
- Explored alignment of user-centred design and accessibility with long-term business goals.

London, United Kingdom  
Aug 2024 – Sep 2024

### NicheFish, Web Designer and Software Developer

- Built interactive web features using WebGL, JavaScript, and Three.js to display animated 3D models on a lead-gen platform.
- Developed backend services with Python and Flask to process user inputs, perform geocoding, and fetch location-based leads via third-party APIs.

London, United Kingdom  
Feb 2024 – Apr 2024

- Refactored data processing and caching logic, cutting lead search time from 8 minutes to 2 by optimising API requests and introducing async task queues (Celery, Redis).

## Education

---

<b>BSc</b>	<b>University College London</b> , Information Management for Business (IMB)	London
	<ul style="list-style-type: none"><li>• Studying a mix of computer science, data analysis, and business management</li><li>• Active in tech and entrepreneurship societies, working on personal projects, and freelance work alongside studies</li></ul>	Jan 2025 – Jan 2025
<b>IB</b>	<b>ACS International School Cobham</b> , International Baccalaureate	Cobham, SRY
	<ul style="list-style-type: none"><li>• 40/45 Achieved, Honours Roll - Ranked fourth out of 152 students</li><li>• Higher Level Subjects: Maths AI (7/7), Business (7/7), Economics (7/7)</li><li>• Extended Essay on Apple's monopolistic practices</li><li>• Led school's Investment Club for two years, organising speaker events and games for over 60 members</li></ul>	Jan 2018 – Jan 2025

## Skills

---

**Programming:** Python, JavaScript, TypeScript, HTML, CSS

**Frameworks & Tools:** Flask, React, WebGL, Three.js, Webflow

**Data & Analysis:** pandas, NumPy, SQL, Excel, data cleaning

**Design:** UI/UX design, responsive web design, Adobe Creative Suite, Webflow
